

➤ **Continuous flow sealing machine**

designed for the sealing of all types of plastic materials
simple and complex materials including PE.

Compatible with paper/plastic, aluminum/plastic, coated paper, plastic
laminates, Tyvek

General characteristics

- Flat seal with a width of 10 mm
- Drive triggered by the introduction of the bag from 0 to 30 mm
- Adjustable sealing position
- Adjustable feed speed
- Temperature control from 20 °C to 200 °C
- Digital temperature display
- Adjustable pressure of the rollers:
- Cycle counter with reset
- All stainless-steel construction

Option

Roller table : 980 x 300 mm

Technical specifications	A 2A
Rate (depending on the pouches)	700 à 1500 pouches/h
Welding width	10 mm
Max. scroll speed	8m/min
Max. bag weight	15 kg
Adjustable pressure	2 à 8 N
Dimensions	760 x 230 x 350 mm
Power supply	230 V
Power	800 W
Weight	23 Kg
